

Neat devices

Neat devices address all types of meeting spaces throughout today's ever-evolving modern workplaces, people's homes and other premises. That includes open plan areas, physical meeting rooms, social zones, makeshift home offices, you name it. They are purpose-designed for Microsoft Teams and Zoom, enabling higher efficiency, well-being and social interaction to maximize the creativity, productivity and culture of your distributed teams.

Neat Bar

Neat Bar is a simple, compact, elegant meeting room device that easily mimics real-life interactions and delivers superior-quality audio and video. It works brilliantly for meeting, huddle or focus spaces for up to ten people.

Neat Frame

Neat Frame is a unique portrait-oriented touch-screen device ideal for your home office, company's huddle spaces, or hotdesking areas, providing a convenient way to meet. Its superb eye-level camera gives you a naturally engaging, inclusive meeting experience.

Neat Bar Pro

Neat Bar Pro drives up to three large monitors to give you the ultimate immersive meeting experience by allowing you to simultaneously see people and content more easily. Neat Bar Pro is perfect for medium or large rooms.

Neat Pad

Neat Pad is a slimline, discreet touchscreen device for starting and controlling your meeting or checking room availability to book and reserve workspaces. Neat Pad pairs with Neat Bar and Neat Bar Pro to complete your meeting room experience.

Neat Board

Neat Board is the complete meeting room package in a simple, elegant, all-in-one device. Comprising a 65" multi-touch screen, a powerful audio system and a versatile wide-angle camera, Neat Board makes annotating and whiteboarding simple for ideation sessions.

Neat Center

Neat Center is a companion device that extends the power of other Neat devices and Neat Symmetry to ensure remote meeting attendees enjoy a consistently closer, clearer, face-on audio-visual perspective of everyone in the room.

Neat Board 50

Neat Board 50 is a sleek yet powerful device designed for greater flexibility throughout your office spaces. The 50-inch touchscreen system paired with an adaptive stand or wall mount, allows anyone to adjust the screen up or down for optimal use and viewing.
